DETAILED ACTION

Response to Amendment

Continued Examination Under 37 CFR 1.114

I. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/21/2008 has been entered.

Allowable Subject Matter

II. The following is an examiner's statement of reasons for allowance:

Claim 9 recites a method for transmitting data with a defined number of bits via a physical channel in a communications system, the physical channel being used by at least one first communication device and one second communication device with steps as defined in the specification (pages 4-14) including providing that the data to be transmitted is composed of load data and identification data for identifying the second communication device; separately coding the load data and the identification data from each other using convolutional coding, wherein a same number of bits is produced after the coding operation for the load data and the identification data; linking the coded load data and the coded identification data with each other via an XOR linking operation; and matching a data rate to the number of bits defined for the physical channel using a rate matching pattern selected from the group consisting of a rate matching pattern used immediately before the XOR linking operation and a rate matching pattern

used immediately after the XOR linking operation, the rate matching pattern defining which bits in a data stream have at least one characteristic selected from the group consisting of being punctured and being repeated, wherein the rate matching pattern for the load data and the identification data is identical.

Applicant's independent claim 9 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Claims 10-15 are allowable based on their dependence of independent claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
